An Update From NCQA©: Focusing On HEDIS® Behavioral Health Measures

Wednesday, August 22, 2018 | 12pm ET | 9am PT

The National Committee for Quality Assurance (NCQA) maintains its focus on behavioral health quality measures by continually updating and improving its performance measurement tool known as the Healthcare Effectiveness Data and Information Set (HEDIS). During this virtual forum experts from NCQA -- Junqing Liu, PhD, MSW, Research Scientist; Lauren Niles, MPH, Senior Health Care Analyst; and Nora Fritz, BA, Health Care Analyst -- will present a brief background on measure development, performance of current HEDIS behavioral health measures, future work around treatment for substance use disorders and pain management, and identification of gaps in care and challenges related to HEDIS behavioral health measures (e.g. unhealthy alcohol use screening and follow-up, depression screening and followup).

Visit www.PsychU.org/events/virtual-forums to learn more and register today.
