

Social Determinants Of Health And Peer Support: Playing A Role In Mental Health Treatment And Recovery During The COVID-19 Pandemic

Thursday, May 28, 2020 | 12pm ET/9am PT | 3pm ET/12pm PT

Living and working during a pandemic is stressful—the uncertainty, the anxiety, the isolation. All take a toll on physical and mental health. But also exerting an effect are the social determinants of health; indeed, their influence may be magnified during this time. Join Dwayne Mayes, a Peer Support Specialist, and David Larsen, RN, MHA, a Director of Quality Improvement, to listen in as they discuss how the facts of where you were born, where you currently live, how you live, and your access to health care affect your health—and what role peer supports can play to improve outcomes.

Please Note: Due to high levels of interest, please access this webinar via your computer. If you are unable to access via your computer or prefer to dial-in via phone, please register for the 3:00pm ET rebroadcast.

Speakers are paid consultants to Otsuka Pharmaceutical Development & Commercialization, Inc.
